

What we learned

- GIT
 - how to use it correctly
 - commit more often (so that the others see what you are doing)
 - clearly mark bugged commits
- Customer communication
 - don't promise too much
 - admit what you don't know
 - keep track of his requests

What we learned

- Programming / Team Work
 - good comments help the team
 - clear and transparent communication
 - clear responsibilities
 - using Android framework
 - use provided methods instead of implementing everything yourself
 - thinking before doing
